🔍 WinForensics

A comprehensive Windows forensic artifacts reference — built for investigators, incident responders, and security analysts who need fast, reliable answers during live investigations.

Live site: https://yourusername.github.io/winforensics

📦 What's Inside

File	Description
windows-artifacts.html	Main cheat sheet — 117 artifacts, 20 categories

Coming Soon

- attack-chain.html — Kill chain phase → artifact mapping
- memory-forensics.html — Full Volatility 3 reference
- ad-deepdive.html — Active Directory forensics deep dive

🗂️ Categories Covered

Category	Artifacts
Registry	SAM, SYSTEM, SOFTWARE, NTUSER.DAT, USRCLASS.DAT, AmCache, ShimCache
Event Logs	Security, System, Application, PowerShell, Sysmon, Defender, Task Scheduler

Category	Artifacts
File System	Prefetch, LNK, Jump Lists, Shellbags, MFT, UsnJrnl, Recycle Bin, VSS
Browser	Chrome, Edge, Firefox, Internet Explorer
Browser Deep Dive	IndexedDB, Extensions, Incognito, Cache, Passwords, Sessions, Cookies
Network	Network Profiles, RDP, DNS Cache, Firewall Logs, ARP Cache
Execution	UserAssist, BAM/DAM, SRUM, Run Keys, CapabilityAccessManager
Memory	hiberfil.sys, Pagefile, Crash Dumps
User Activity	RecentDocs, TypedURLs, Timeline, Sticky Notes, Thumbcache
USB & Devices	USB History, setupapi.dev.log
Persistence	Scheduled Tasks, Services, WMI Subscriptions, Bootkits, DLL Hijacking
Cloud & Sync	OneDrive, Dropbox, Google Drive
Registry MRU	OpenSaveMRU, LastVisitedMRU, RunMRU, WordWheelQuery, Office MRU
LOLBAS	certutil, mshta, rundll32, wscript, regsvr32, bitsadmin, msiexec, wmic
Credentials	LSASS, Credential Manager, DPAPI, SAM+SYSTEM, Kerberos, WiFi
Anti-Forensics	CCleaner, BitLocker, cipher.exe, SDelete, VSS Deletion, Log Manipulation
Lateral Movement	PsExec, SMB Shares, WinRM, DCOM
Email	Outlook PST/OST, Attachment Cache
Active Directory	NTDS.dit, DCSync, GPO Artifacts

Category	Artifacts
Misc	Notepad++, Windows Search, Windows Recall/Copilot

✨ Features

- **117 artifacts** across **20 categories**
- **Live search** across all fields — paths, notes, event IDs, tools, commands
- **Category filter** tabs for instant filtering
- **428 exact commands** — one click to copy any command or path
- **Forensic value rating** — CRITICAL / HIGH / MEDIUM / LOW per artifact
- **Event ID references** per artifact
- **OS version coverage** per artifact
- **Fully offline** — no external dependencies, works without internet
- **Mobile friendly** — works on phone during live investigations

---

🚀 How to Use Locally

Just open `windows-artifacts.html` in any browser. No server needed, no install, no dependencies.

```bash
git clone https://github.com/yourusername/winforensics
cd winforensics
open windows-artifacts.html   # macOS
start windows-artifacts.html  # Windows
```

📱 Mobile Use

Fully optimized for mobile. Pull it up on your phone mid-investigation to quickly check artifact paths, event IDs, or copy commands.

🛠️ Tools Referenced

This reference covers artifacts analyzed by tools including:

Autopsy | Volatility | RegRipper | Chainsaw | Hayabusa | Hindsight | MFTECmd | PECmd | LECmd | JLECmd | AmcacheParser | AppCompatCacheParser | WxTCmd | RBCmd | SrumECmd | Registry Explorer | ShellBagsExplorer | DB Browser for SQLite | FTK Imager | Velociraptor | Plaso | log2timeline | Impacket | Mimikatz

---

📌 Quick Reference — Most Important Event IDs

Event ID	Log	Meaning
4624	Security	Successful logon
4625	Security	Failed logon
4688	Security	Process creation (with command line)
4698	Security	Scheduled task created
4719	Security	Audit policy changed

Event ID	Log	Meaning
7045	System	New service installed
1102	Security	Security log cleared
104	System	System log cleared
5140	Security	Network share accessed
4662	Security	AD object accessed (DCSync detection)
1	Sysmon	Process creation
3	Sysmon	Network connection
7	Sysmon	Image/DLL loaded
10	Sysmon	Process accessed (LSASS dump detection)

⚠️ Disclaimer

This reference is intended for **authorized forensic investigations, incident response, and security research only**. All information is provided for defensive and educational purposes.

Built for the forensics community — contributions welcome.
